

Essay Quest Online · v8 overhaul — design review

What changed

Battle stats are now Pokémon-style: HP, Attack, Defense, Sp. Atk, Sp. Def and Speed. Physical moves use Attack vs Defense; special moves use Sp. Atk vs Sp. Def only. The Pokémon damage formula, STAB $\times 1.5$, the full type chart and $\times 1.5$ crits are used. Speed sets turn order, and Speed from gear gives 0.33% dodge per point (max 40%).

Requirement stats STR, AGI, INT, FOR and WPN only decide what you can equip. Requirements are fixed per item and never rise. You get 4 / 3 / 2 points a level in 20 / 30 / 50-round runs, so a planner can wear a Legendary piece at about round 11 / 14 / 20. Example: Armour of the Black Swordsman = 320 HP, 90 Def, 70 Sp. Def, 30 Speed; the Dragon Slayer sword = 110 Attack, 0 Sp. Atk.

Seven rarities: Common, Uncommon, Rare, Epic, Legendary, Mythical, Outerversal. 70 armour designs: 15 base designs worn at Common/Uncommon/Rare, 15 Epic, 13 Legendary + 12 Mythical myth designs, 15 Outerversal.

Loot: Legendary only from ★6 (40%), ★7 (70%), mini-bosses (30%) and main bosses (55%). Mythical only from ★7 (25%) and main bosses (12%). Outerversal only from ★10 (50%). Each land drops its own myths.

Two new countries: Yamato (Japan) and Hellas (Greece), each with 12+ monsters, 4 mini-bosses, bosses, gods and five battle maps.

Boons doubled from 33 to 66. Double Loot (1,400 Wisdom) and Lucky Find (1,600 Wisdom) now cost a fortune; 6 boon slots.

Run lengths 20, 30 and 50 rounds. Heroes gain about two levels a round (round 25 is around level 50); quests give twice the XP.

Balance (simulated with the real game code, 500+ runs each): Hard 30 rounds is won about 25% of the time solo and about 50% with one support player.

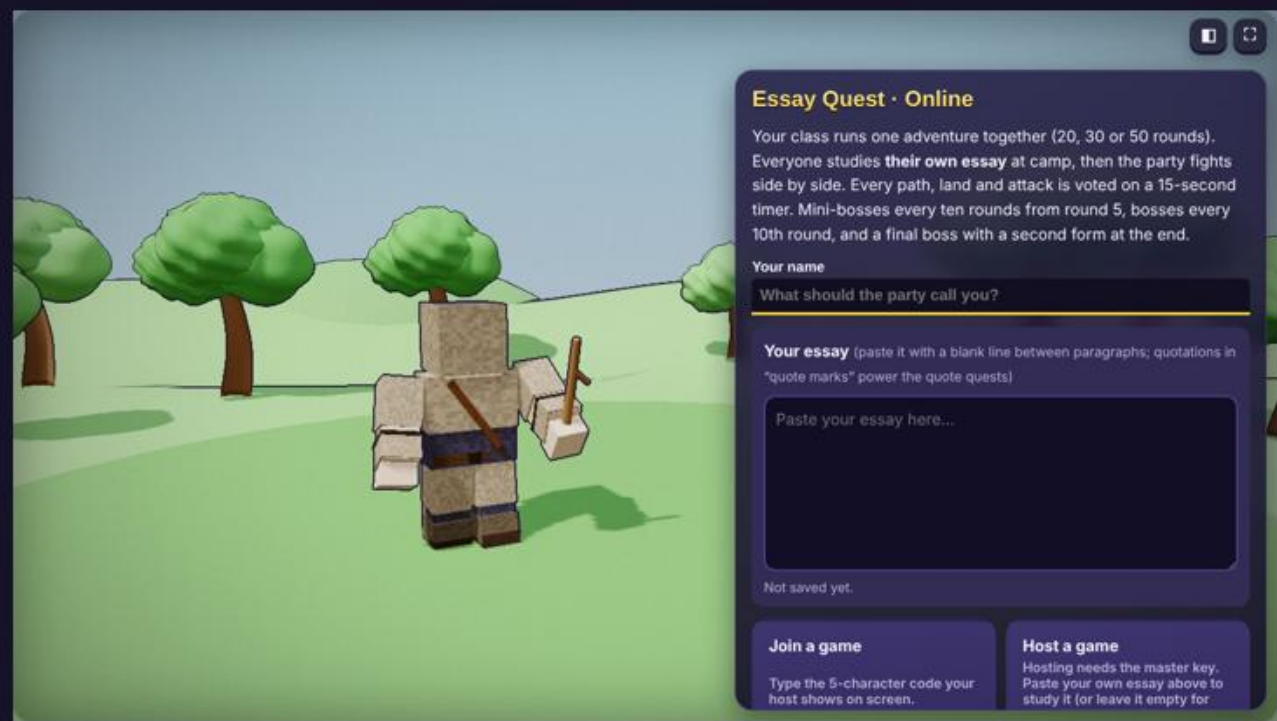

Visuals and UI

Heroes are blocky Minecraft-style with pixel textures and a character customiser. Monsters are smooth, multi-jointed models (necks weave, tails swish, wings beat). Bosses fight in a dark, blood-lit arena with spiked crowns, burning eyes, smoke and embers.

The battlefield fills the screen. Controls are one slim strip of four move bars at the bottom (type, physical/special, power, accuracy, energy, effectiveness). Small nameplates; hover your own for both stat systems (others show only HP, the host sees all). Compact party chat and a small activity feed. Full-screen button.

UI changes

Every screen floats over the 3D battlefield
